

Curriculum Vita

Personal Information

First Name: Alireza

Surname: Ansari-Moghaddam

Date of Birth: 23/06/1967

Gender: male

Title: Mr

Work Address

Epidemiology and Biostatistics
Group

Health School
Zahedan University of Medical
Sciences
Zahedan, Iran

.E.mail: ansarialireza@yahoo.com

Tel: +98 543 3222952 &

+ 98 915 5412155

Current position

Phd Epidemiology, Academic member of Zahedan University of Medical Sciences

Educational Background

2008 PhD. Epidemiology. University of Sydney(Australia)

1999 MSc. Epidemiology. University of Shiraz (Iran)

1996 BSc. Public Health. University of Kerman (Iran)

Employment

2016 Professor of Epidemiology in Zahedan University of medical sciences,2016

2012 Associate professor of Epidemiology in Zahedan University of medical sciences,2012

(2007-2011) Assistant professor of Epidemiology in Zahedan University of medical sciences

Professional Experience

- (2009-2017) Director of Health Promotion Research Center, Zahedan
University of medical sciences
- (2009-2017) Deputy of Research in School of Health, Zahedan University of
medical sciences
- (1988-1991). Supervisor in border Quarantine of Islamic Republic of IRAN and
Pakistan and Afghan refugee camps
- (1992-1993). Incharge of the province Quarantine (Sistan & Baluchestan)
- 1996 Director of Measles and Poliomyelitis in CDC of Zahedan
- (1999-2000) Director of AIDS and Tuberculosis division in center for disease
control and prevention of Zahedan
- (2001-2003) Head of student center for research in health faculty of Zahedan.
- (2000-2003). Statistics and methodological advisor in Zahedan University

Membership of Professional

- Member of Research and Education committee in School of Health of
Zahedan (Iran) (2007-2017).
- Member of Research ethic committee of Zahedan University of medical
sciences (2007-2017).
- Member of poliomyelitis committee in Zahedan University of medical
sciences (1996-2003).
- Member of AIDS committee in Zahedan University of medical sciences
(1999-2003)
- Director of Health Promotion Research Center, Zahedan University of
medical sciences (2009-2017).

- Deputy of Research in School of Health, Zahedan University of medical sciences (2009-2017).

Teaching & Advisory Activities:

I have taught Epidemiological methods, National program against diseases, Vaccine monitoring and evaluation in Zahedan University of Medical Sciences (Iran). I have also taught in some workshops related to the introductory and advanced research methods and statistical analysis.

In addition, I have been the supervisor of more than 50 students in faculty of health and Nursing/ Midwifery; University of Zahedan (Iran). I have been also the statistical and Methodological advisor for more than 300 theses in the faculty of Medicine, Health, Nursing and Dentistry, University of Zahedan (Iran).

Research experience

I previously worked as the principal or co- investigator on the following research projects in which I was involved in all stages of the research process including the study design, data collection, data analysis, interpretation and writing of the final reports. A brief summary of these studies is given below:

1. Knowledge, Perceptions, and Prevention of Malaria among Women in Sistan and Baluchestan, Iran.

A cross-sectional study conducted among 2168 women from rural and urban areas of Sistan and Baluchestan, Iran. The objective of the study was to examine individuals' knowledge, beliefs and practices of malarial transmission and to identify factors that influenced them.

2. The Role of Couple's Communication in Family Planning Decision-Making in Zahedan, Iran.

A qualitative study of 380 randomly selected participants from different sectors of Zahedan (Iran). The aim was to investigate the role of the couple's communication in family planning decision-making, and to identify factors that may have affected the family planning decision-making process.

3. Epidemiologic study on twin pregnancies in Zahedan, Iran.

A study of 400 twin pregnancies in all maternity hospitals of Zahedan (Iran). The study aim was to examine maternal predictors of twin births and anthropometric outcomes of twins during a one-year follow up period.

PhD project, at the University of Sydney, School of public Health.

During the 3.5 years I worked on the large database of the Asia-Pacific Cohort Studies Collaboration (APCSC) to quantify the importance of some of the risk factors involved in cardiovascular disease on cancer. I performed a set of structured meta-analyses of the published literature together with analysing these variables in APCSC.

The primary aims of my thesis were:

To examine the impact of potentially modifiable risk factors including smoking, obesity and diabetes on mortality from some of the leading cancer types (lung, upper aero digestive tract, pancreas, prostate, colon and rectum) in the Asia-Pacific populations;

To estimate the current and projected burden for each of these site-specific cancers that, potentially, could be avoided by modification of diet and lifestyle by calculation of the population attributable risks. The results of the abovementioned reviews and analyses have produced 10 published articles.

I conducted the following research projects (granted from WHO) recently:

- A comprehensive base line survey on malaria prevention, treatment and care and community perception in high risk malarias area in Iran.
- Ownership and utilization of long-lasting insecticide treated nets in selected malaria prone areas of Iran-The success of free distribution.
- Prevalence of Glucose-6-Phosphate Dehydrogenase (G6PD) deficiency in malaria endemic region of Iran (Sistan & Baluchestan Province): Epidemiological profile and trends over time (SGS 14/20, 2015).
- Independent monitoring of Polio Supplementary Immunization Activities (SIA) in Sistan and Baluchistan Province, 2015.
- To quantify knowledge, attitude and behavior of migrant, mobile and remote populations on malaria using an information – motivation – behavior skill model

Additionally, I am now **principal investigator** of **adults and eye cohorts in** Zahedan which is part of Persian cohort under **supervision of professors Malekzadeh and Heashemi**

Grants and Research Activities

WHO grant on malaria survey, 2009

WHO grant on malaria survey, 2009

WHO grant on prevalence of Glucose-6-Phosphate Dehydrogenase (G6PD) deficiency in malaria endemic region of Iran (Sistan & Baluchestan Province), 2015

WHO grant on Independent monitoring of Polio Supplementary Immunization Activities (SIA) in Sistan and Baluchistan Province, 2015.

Selected Awards and Honors

PhD scholarship in Epidemiology from Iranian Ministry of Health for 4 years

Award of the state of Kuwait Prize for the control of cancer, cardiovascular diseases and diabetes in the Eastern Mediterranean Region, 2011

Award of the 16th Razi Research Festival for Health Promotion Research Center (first rank), 2010

Award of the 17th Razi Research Festival for being ranked as the forth order in HSR section

Professional Training
